

Dear Resident/Property Owner,

The telecommunications industry will be deploying infrastructure that will bring 5th Generation (5G) technology to the District of Columbia via wireless telecommunication antennae and equipment (small cell). AT&T is seeking to locate and install its small cell wireless network on your block. The proposed installation will be located at 1900 16th St NW. As part of this initiative we will be applying for a Public Space Permit from the District Department of Transportation (DDOT). We are notifying you, as a resident, of small cell facility requested to be install on your block.

Please find attached, the design of the small cell technology being deployed in the ANC and the proposed timeline for installation. From more information on the approval process and guidelines is available online at <https://ddot.dc.gov/smallcell>

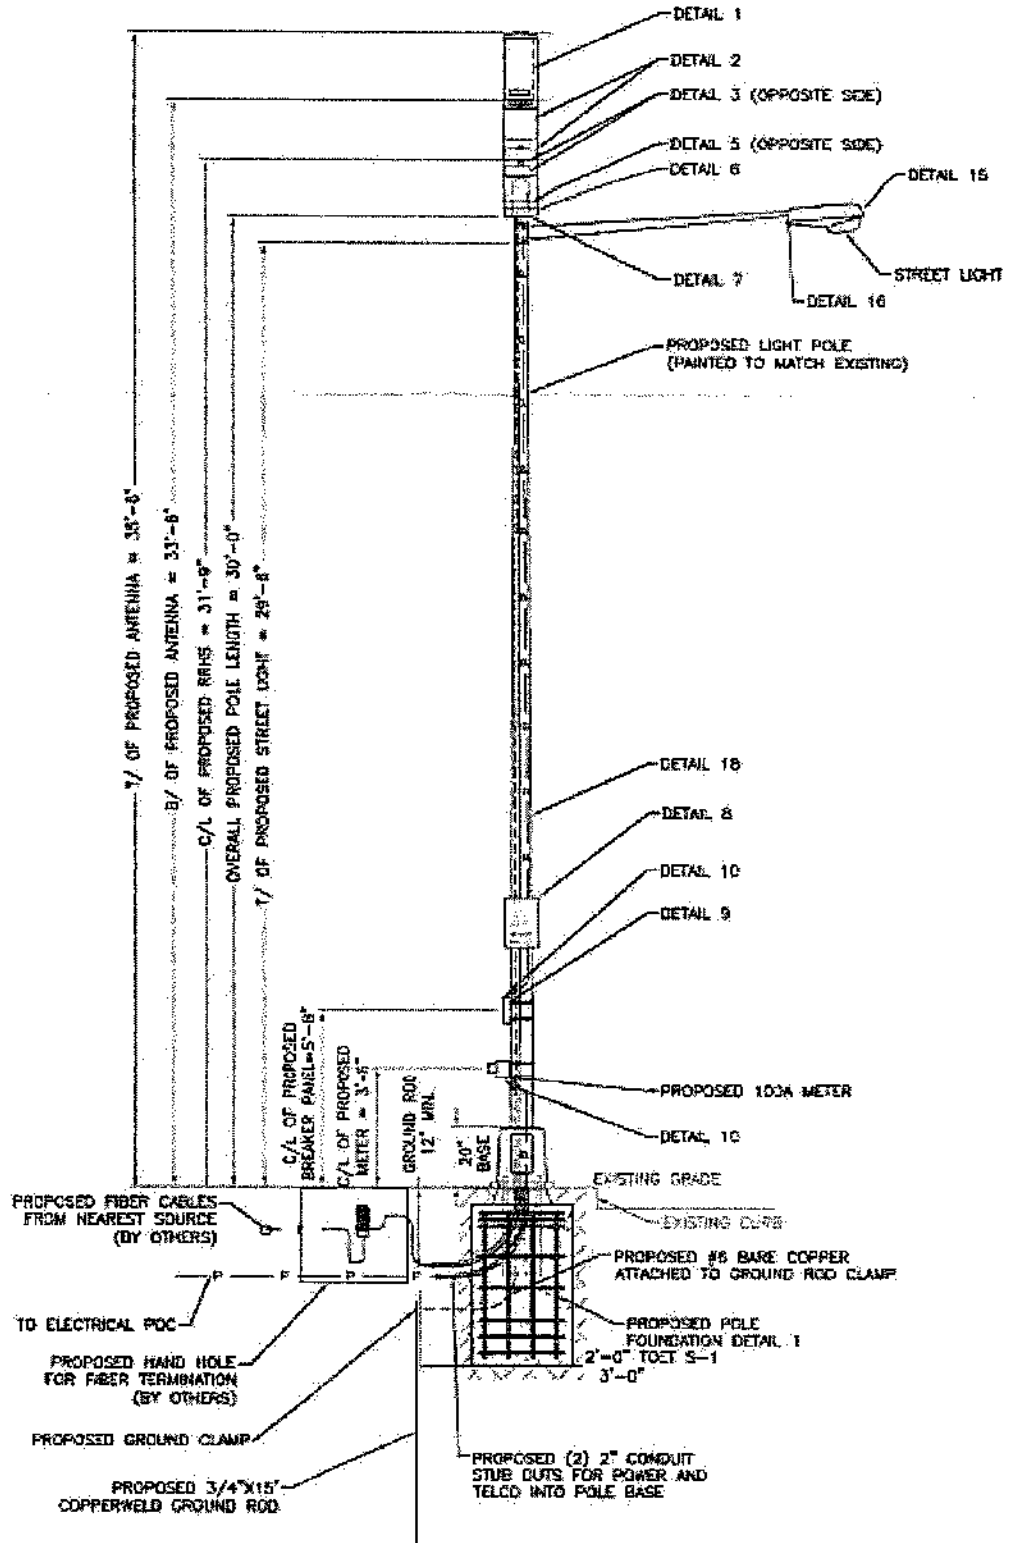

For more information on your neighborhood deployment, please feel free to contact me at (443) 875- 3794 or by email at Genelle.Newhard@att.com.

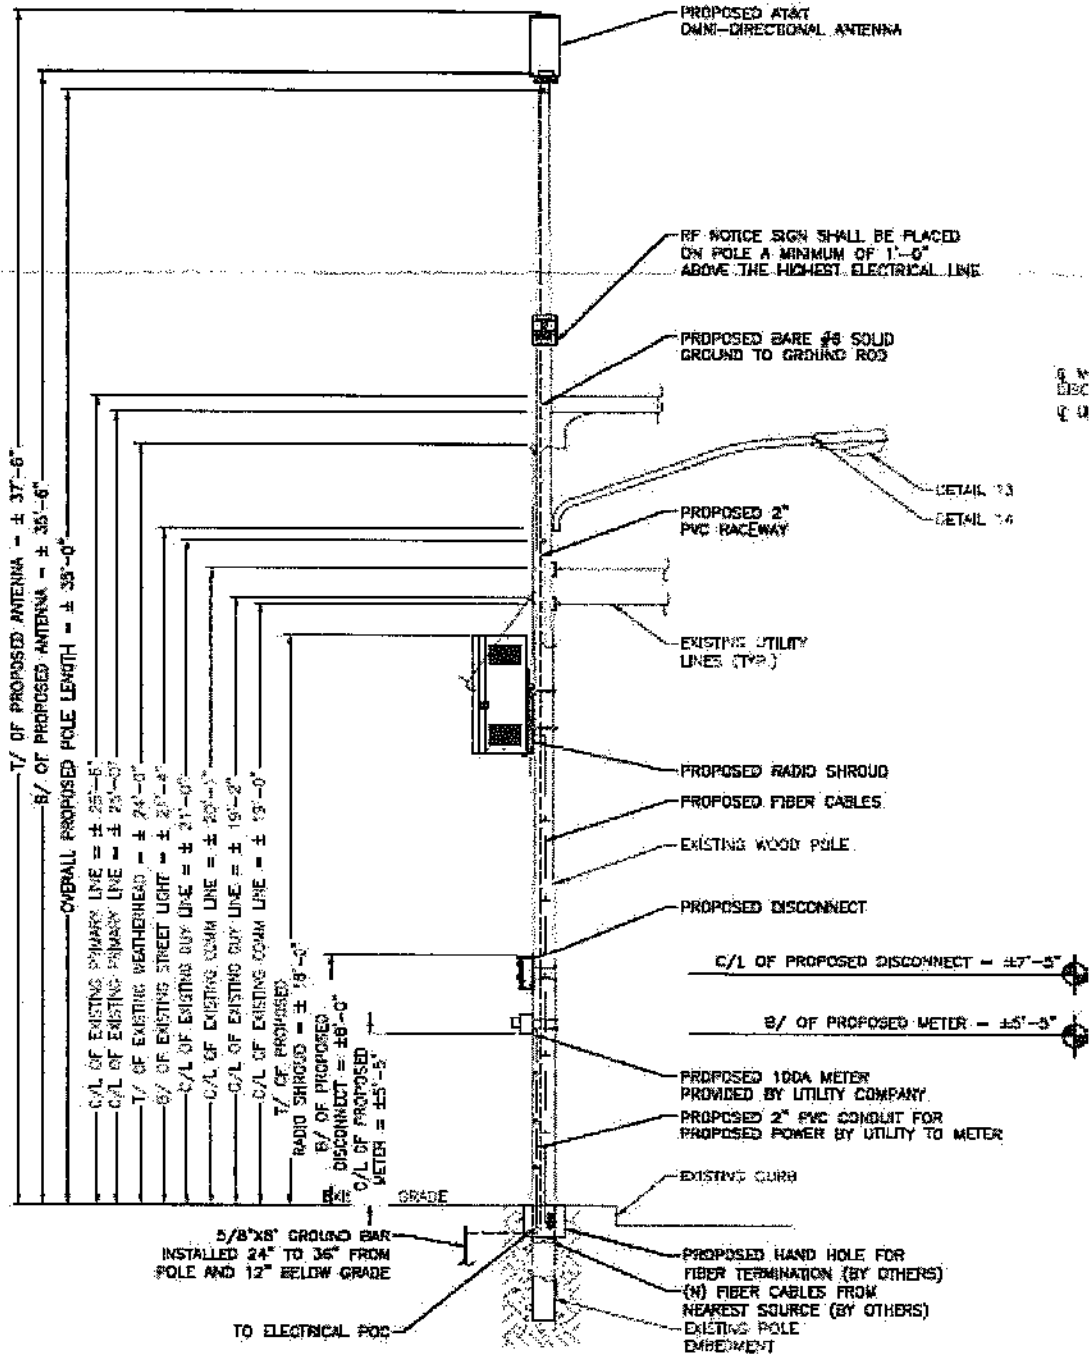

Sincerely,

A handwritten signature in black ink, appearing to read "Genelle Newhard".
